MUKUL ANAND SENGAR

DevSecOps Engineer • Cloud Engineer • Azure DevOps Engineer

+91 9582026267 | mukulsengar329@gmail.com | Ghaziabad, Uttar Pradesh, India | linkedin.com/in/mukulsengar | github.com/mukul-329

Professional Summary

DevOps Engineer with 4+ years of experience in designing, automating, and operating cloud infrastructure across Azure and Amazon Web Services (AWS). Built CI/CD pipelines with Azure DevOps, GitHub Actions, and Jenkins; automated infrastructure with Terraform; and orchestrated containerized workloads with Kubernetes and Helm. Delivered GitOps workflows using ArgoCD and observability with Prometheus, Grafana, and the ELK Stack, sustaining 99.9% production uptime across hybrid cloud environments. Holds 4 industry certifications, including AZ-400 DevOps Engineer Expert and HashiCorp Terraform Associate.

Technical Skills

Cloud Platforms: Azure (VM, VNet, NSG, AKS, Azure Monitor, Key Vault, App Service), AWS (EC2, S3, IAM, VPC, EKS, CloudWatch, Lambda)
Infrastructure as Code (IaC): Terraform, ARM Templates, Bicep, Ansible, CloudFormation
CI/CD & DevOps: Azure DevOps (YAML Pipelines), Jenkins, GitHub Actions, GitLab CI, ArgoCD
Containers & Orchestration: Docker, Kubernetes (Deployments, Services, Ingress, RBAC), Helm, AKS, EKS
Monitoring & Observability: Azure Monitor, CloudWatch, Grafana, Prometheus, ELK Stack
Scripting & Programming: Bash, Python, PowerShell, YAML
Security & Networking: IAM, SonarQube, Trivy, OWASP, RBAC, DNS, TCP/IP, VPN, Load Balancers, NSG, Firewall Rules
Source Control Management: Git, GitHub, Azure Repos
Operating Systems: Linux, Windows Server

Experience

HCLTech | DevOps Engineer | *Oct 2022 – Present*

- Architected end-to-end CI/CD pipelines using Azure DevOps YAML for DNS reconfiguration and infrastructure automation across hybrid Azure and AWS environments, improving DNS resolution performance by 10x and reducing deployment errors by 35%.
- Engineered a hybrid cloud onboarding workflow connecting Azure VNets and AWS VPCs to on-premises infrastructure via Site-to-Site VPN and ExpressRoute, standardizing connectivity for 25+ enterprise workloads and cutting onboarding time from 3 days to 1 day.
- Implemented monitoring and alerting with Azure Monitor, CloudWatch, Prometheus, and Grafana dashboards for pod health, SLA metrics, and resource utilization, reducing MTTD by 50%.
- Standardized Docker, Kubernetes, and Helm deployments across 3 environments and integrated DevSecOps practices—including compliance checks, secret scanning, and least-privilege IAM—into CI/CD pipelines, enabling zero-downtime deployments with automated rollback and reducing release cycle time and security-review time by 40%.
- Provided on-call production support across hybrid Azure/AWS environments, performing root-cause analysis on P1/P2 incidents and cutting recurring-incident volume by 60% quarter-over-quarter.
- Developed reusable CloudFormation templates and Ansible playbooks to automate infrastructure provisioning, configuration management, and Linux OS hardening across 20+ servers, reducing configuration drift by 40%.

Projects

Kubernetes GitOps Pipeline | ArgoCD, Helm | *Aug 2026*

- Built a production-grade GitOps pipeline with ArgoCD for continuous delivery to Kubernetes, using Helm chart templating across dev, staging, and production environments.
- Built a GitHub Actions-to-Argo CD delivery pipeline that built and published Docker images, then synchronized Kubernetes deployments on merge in under five minutes.
- Configured Prometheus scraping and Grafana dashboards for pod-level observability; enforced RBAC policies and Sealed Secrets.

Azure Terraform Module (v1.0.8) | Terraform, Azure, IaC | *Mar 2024*

- Provisioned Terraform-based IaC templates for Azure VMs, VNets, NSGs, and Storage Accounts, cutting provisioning time from hours to under 10 minutes.
- Designed a variable-driven, modular architecture enabling multi-environment deployments from a single codebase, cutting provisioning effort by 70% vs manual ARM templates.
- Extended a reusable Terraform module for Windows and Linux VM provisioning, using remote backends and workspace isolation to support three environments from a single codebase.

Certifications

Microsoft Azure: AZ-400 DevOps Engineer Expert, AZ-104 Administrator Associate
HashiCorp: Terraform Associate
Python Institute: Python Associate Programmer

Education

Bachelor of Technology | Computer Science | *Aug 2016 – Dec 2020*
Guru Gobind Singh Indraprastha University, *CGPA: 7.5*
